Find the correct match with respect to the normal forms shown below.

	Normal Forms
1	First Normal Form
2	Second Normal Form
3	Third Normal Form
4	Fourth Normal Form

	Properties of Normal Forms
A	To eliminate the functional dependencies in which non-prime attributes determine other non-prime attributes.
B	Does not allow multivalued attributes.
C	To eliminate multivalued dependencies.
D	To eliminate functional dependencies in which proper subsets of candidate keys determine non-prime attributes.

**Options :**

6406531484513. 1 - B, 2 - A, 3 - D, 4 - C

6406531484514. 1 - C, 2 - D, 3 - A, 4 - B

6406531484515. 1 - C, 2 - A, 3 - D , 4 - B

6406531484516. 1 - B, 2 - D, 3 - A , 4 - C

Question Label : Multiple Choice Question

A company manufactures magnetic disks and sells them to the local markets. These magnetic disks are tested before they are sold to determine their average lifespan. While testing a set of 150 magnetic disks for 1700 hours, you observed that 35 magnetic disks lasted for 1500 hours, 70 magnetic disks lasted for 1650 hours and the remaining lasted for 1300 hours.

What will be the MTTF of 100 magnetic disks randomly selected from the set?

**Options :**

6406531484530. 1.5 hours

6406531484531. 15.1 hours

6406531484532. 31 hours

6406531484533. None of these

Question Label : Multiple Choice Question

Consider a relation  $\text{CustomerLogs}(\text{Name}, \text{Items}, \text{Restaurant}, \text{Date})$  with the following data values.

Name	Items	Restaurant	Date
Zury	Coffee	Your's cafe	19-10-21
Zury	Tea	Our's cafe	21-10-21
Zury	Tea	C	E
Zury	A	B	D

If multivalued dependency ( $\text{Name} \twoheadrightarrow \{\text{Items}, \text{Date}\}$ ) exists in the above  $\text{CustomerLogs}$  relation, then what are the values of A, B, C, D, E?

**Options :**

6406531484517. A = Tea, B = Your's cafe, C = Our's cafe, D = 21-10-21, E = 19-10-21

6406531484518. A = Coffee, B = Your's cafe, C = Our's cafe, D = 21-10-21, E = 19-10-21

6406531484519. A = Coffee, B = Our's cafe, C = Your's cafe, D = 19-10-21 , E = 21-10-21

6406531484520. A = Tea, B = Our's cafe, C = Your's cafe, D = 19-10-21, E = 21-10-21

Question Label : Multiple Choice Question

Consider the relation  $R(A, B, C, D, E, G)$  with the following sets of functional dependencies

$$\mathcal{F} = \{AB \rightarrow C, AC \rightarrow B, AD \rightarrow E, B \rightarrow D, BC \rightarrow A, E \rightarrow G\}$$

Let the  $R$  is decomposed in two ways:

$$D1 = R1(AB), R2(BC), R3(ABDE), R4(EG)$$

$$D2 = R1(ABC), R2(ACDE), R3(ADG)$$

Which among the following statement is correct?

**Options :**

6406531484545.  $D1$  is a lossless decomposition and  $D2$  is a lossy decomposition.

6406531484546.  $D1$  is a lossy decomposition and  $D2$  is a lossless decomposition.

6406531484547.  $D1$  and  $D2$  both are lossless decompositions.

6406531484548.  $D1$  and  $D2$  both are lossy decompositions.

Question Label : Multiple Select Question

Consider the relational schemas shown below.

**movie**(m\_id, title, year, p\_id)  
**producer**(p\_id, name, contact)

Assume that both the relations consists of large number of tuples. Let the following queries be executed on the two relations.

1. `SELECT p.name, m.title FROM producer AS p NATURAL JOIN movie AS m  
WHERE m.year > '2002-12-31'`
2. `SELECT title, year FROM movie  
WHERE m_id = 'M025'`
3. `SELECT p.name, m.title FROM producer AS p, movie AS m  
WHERE m.p_id = p.p_id  
AND p.name = 'Yash'`

Identify which of the statement(s) is/are true?

**Options :**

6406531484538. Query 1 and 2 will execute more efficiently when sequential file organization scheme is used.
6406531484539. Query 1 and 3 will execute more efficiently when multitable clustering file organization scheme is used.
6406531484540. Query 2 and 3 will execute more efficiently when sequential clustering file organization scheme is used.
6406531484541. Query 2 will execute more efficiently when multitable clustering file organization scheme is used.
6406531484542. Query 2 will execute more efficiently when sequential clustering file organization scheme is used.

**Question Number : 98 Question Id : 640653445543 Question Type : MSQ Is Question**

**Question Label : Multiple Select Question**

In the relational schema given below, the domains of all its attributes are atomic only.

$R(employee\_num, employee\_name, department\_num, department\_name)$

Suppose  $R$  satisfies the following functional dependencies:

$\{employee\_num \rightarrow employee\_name,$   
 $department\_num \rightarrow department\_name,$   
 $employee\_num \rightarrow department\_name\}$

If  $R$  is decomposed into:

$R1(employee\_num, employee\_name)$  and

$R2(department\_num, department\_name),$

then, which among the following statement(s) is/are correct?

**Options :**

6406531484549.  $R1$  and  $R2$  are in BCNF, but decomposition is not a dependency preserving one.
6406531484550.  $R1$  and  $R2$  are in BCNF, but decomposition is a lossy.
6406531484551.  $R1$  and  $R2$  are in BCNF, but decomposition is a lossless decomposition as well as dependency preserving.
6406531484552.  $R1$  and  $R2$  are not in BCNF, and decomposition is neither a lossless nor dependency preserving.

**Response Time : N.A Think Time : N.A Minimum Instruction Time : 0**

**Correct Marks : 4**

**Question Label : Short Answer Question**

Consider the relational schema **car**(*carEngineNo*, *model*, *fuelType*, *company*, *headQuarters*, *aadhaar*, *customer*, *state*, *mobile*, *purchaseDate*) with the following set of functional dependencies (assume that all the attributes have atomic values).

$$\mathcal{F} = \{$$

*carEngineNo*  $\rightarrow$  (*model*, *fuelType*, *company*),  
(*carEngineNo*, *aadhaar*)  $\rightarrow$  *purchaseDate*,  
*company*  $\rightarrow$  *headQuarters*,  
*aadhaar*  $\rightarrow$  (*customer*, *state*),  
*customer*  $\rightarrow$  *mobile*,  
*mobile*  $\rightarrow$  *aadhaar*  
}

Check if the relational schema **car** is in BCNF or not. If **car** is not in BCNF, decompose into minimum **X** number of smaller relations, so that all the smaller relations are in BCNF as well as dependency preserving. The value of **X** is \_\_\_\_\_
