

This assignment will not be graded and is only for practice.

Note : This activity is only for practice purpose and it will not be counted towards the Final score

Which among the following statements is true?

1 point

- ☐ File handling via Python takes less time as compared to DBMS.
- ☐ It is easy to handle insert, update and querying of records using Python than DBMS
- ☐ It is easy to do any set of arithmetic operations using DBMS than using Python
- ☐ None of the above

No, the answer is incorrect.

Score: 0

Accepted Answers:

None of the above

Which of the following statements is /are true?

1 point

- ☐ In case of file handling via Python, it is very difficult to detect and maintain relationships between entities if and when an attribute has to be removed.
- ☐ In a DBMS, during deletion, constraints are used either not to allow the removal of an attribute or ensure its safe removal.
- ☐ The scalability of file handling using Python with respect to amount of data is higher than that of DBMSs.
- ☐ All of the above

No, the answer is incorrect.

Score: 0

Accepted Answers:

In case of file handling via Python, it is very difficult to detect and maintain relationships between entities if and when an attribute has to be removed.

In a DBMS, during deletion, constraints are used either not to allow the removal of an attribute or ensure its safe removal.

When we compare file handling via Python with a modern DBMS in terms of time and efficiency, which of the following statements is/are true?

1 point

- ☐ The effort to install and configure a database is expensive & time consuming.

- ☐ In order to process a 1GB file, an SQL query would typically take few seconds.
- ☐ In order to process a 1GB file, a program in Python would typically take few seconds.
- ☐ All of the above

No, the answer is incorrect.

Score: 0

Accepted Answers:

The effort to install and configure a database is expensive & time consuming.
In order to process a 1GB file, a program in Python would typically take few seconds.

Which of the following statements is/are true regarding a DBMS?

1 point

- ☐ The installation and maintenance of a DBMS is cheaper than that of file systems.
- ☐ There is extensive support for arithmetic and logical operations.
- ☐ Databases are inherently complex and need specialized people like database administrators to configure and maintain it.
- ☐ All of the above.

No, the answer is incorrect.

Score: 0

Accepted Answers:

Databases are inherently complex and need specialized people like database administrators to configure and maintain it.

Consider the following statements:

1 point

Statement 1 : If we use Python for file handling instead of a DBMS, a programmer has to put in less effort in maintaining the data.

Statement 2 : DBMS has in-built mechanisms to ensure the consistency and sanity of data being inserted, updated or deleted.

- ☐ Statement 1 is true and Statement 2 is false
- ☐ Statement 2 is true and Statement 1 is false
- ☐ Both the statements are true
- ☐ Both the statements are false

No, the answer is incorrect.

Score: 0

Accepted Answers:

Statement 2 is true and Statement 1 is false
