

This assignment will not be graded and is only for practice.

Note : This activity is only for practice purpose and it will not be counted towards the Final score

A database system is conceptualized in terms of three levels of abstraction. Which of the following is not one among these levels?

1 point

- ☐ physical level
- ☐ application level
- ☐ logical level
- ☐ view level

No, the answer is incorrect.

Score: 0

Accepted Answers:

application level

Which of the following levels describes how the records are actually stored?

1 point

- ☐ physical level
- ☐ application level
- ☐ logical level
- ☐ view level

No, the answer is incorrect.

Score: 0

Accepted Answers:

physical level

Which of the following levels describes the relationship between the data in a database system?

1 point

- ☐ physical level
- ☐ application level
- ☐ logical level
- ☐ view level

No, the answer is incorrect.

Score: 0

Accepted Answers:

logical level

At the, application programs may hide certain information for security purposes.

1 point

☐ physical level

☐ application level

☐ logical level

☐ view level

No, the answer is incorrect.

Score: 0

Accepted Answers:

view level

A(n) describes how the data is organized in a database.

1 point

☐ schema

☐ instance

☐ table

☐ record

No, the answer is incorrect.

Score: 0

Accepted Answers:

schema

Which of the following languages defines and manipulates the schema of a database?

1 point

☐ Data Definition Language

☐ Data Manipulation Language

- ☐ Data Control Language
- ☐ Transaction Control Language

No, the answer is incorrect.

Score: 0

Accepted Answers:

Data Definition Language

Which of the following languages can be used to create new records and manipulate existing records in a database? **1 point**

- ☐ Data Definition Language
- ☐ Data Manipulation Language
- ☐ Data Control Language
- ☐ Transaction Control Language

No, the answer is incorrect.

Score: 0

Accepted Answers:

Data Manipulation Language

Which of the following is not a pure query language?

1 point

- ☐ Relational algebra
- ☐ Tuple relation calculus
- ☐ Domain relation calculus
- ☐ Structured query language

No, the answer is incorrect.

Score: 0

Accepted Answers:

Structured query language

Which of the following is/are valid schema type(s)?

1 point

- ☐ Physical schema
- ☐ Application schema
- ☐ Logical schema
- ☐ View schema

No, the answer is incorrect.

Score: 0

Accepted Answers:

Physical schema
Logical schema

Which of the following is/are **true** about schemas in database systems?

1 point

- ☐ It describes the overall structure of the database system.
- ☐ It is the actual content of the database at a particular instant of time.
- ☐ It is similar to the type information of a variable in programming languages.
- ☐ It is similar to the value of a variable in programming languages.

No, the answer is incorrect.

Score: 0

Accepted Answers:

It describes the overall structure of the database system.
It is similar to the type information of a variable in programming languages.

Which of the following is/are **true** about instances in database system?

1 point

- ☐ It describes the overall structure of the database system
- ☐ It is the actual content of the database at a particular instant of time.
- ☐ It is similar to the type information of a variable in programming languages.
- ☐ It is similar to the value of a variable in programming languages.

No, the answer is incorrect.

Score: 0

Accepted Answers:

It is the actual content of the database at a particular instant of time.
It is similar to the value of a variable in programming languages.

Which of the following is/are the content(s) of a data dictionary?

1 point

- ☐ Database schema
- ☐ Database instance
- ☐ Integrity constraints
- ☐ Authorizations

No, the answer is incorrect.

Score: 0

Accepted Answers:

Database schema
Integrity constraints
Authorizations

Which of the following is/are **true** about SQL?

1 point

- ☐ It is a commercial query language.
- ☐ It is a Turing machine equivalent language.
- ☐ It can be embedded in some high-level language.
- ☐ Application programs use interfaces like JDBC and ODBC to send SQL queries to a database.

No, the answer is incorrect.

Score: 0

Accepted Answers:

It is a commercial query language.
It can be embedded in some high-level language.
Application programs use interfaces like JDBC and ODBC to send SQL queries to a database.

Which of the following decisions is/are part of logical design of a database?

1 point

- ☐ How should a database be structured to fulfill business requirements?
- ☐ What are the attributes to be recorded in the database?

- ☐ What should be the physical layout of the database?
- ☐ How the attributes can be distributed among the collection of schemas?

No, the answer is incorrect.

Score: 0

Accepted Answers:

How should a database be structured to fulfill business requirements?

What are the attributes to be recorded in the database?

How the attributes can be distributed among the collection of schemas?

Which of the following decisions is/are part of physical design of a database?

1 point

- ☐ How database has to be structured to fulfill business requirements?
- ☐ What are the attributes to be recorded in the database?
- ☐ What should be the physical layout of the database?
- ☐ How the attributes can be distributed among the collection of schemas?

No, the answer is incorrect.

Score: 0

Accepted Answers:

What should be the physical layout of the database?
