

Consider the following statements:

1. SQL does not provide a direct way of specifying functional dependencies other than superkeys.
2. Our main aim for a relational database design is to achieve lossless decomposition and dependency preservation.
3. Fifth normal form is also called as Elementary Key Normal Form (EKNF)

- ☐ Statements 1 & 2 are correct
- ☐ Statements 1 & 3 are correct
- ☐ Only statement 3 is correct
- ☐ All the statements are correct.

What is the full form of ETNF?

2 points

- ☐ Elementary Tuple Normal Form
- ☐ Essential Tuple Normal Form
- ☐ E-R Tuple Normal Form
- ☐ None of the above

Which among the following statements is/are correct regarding temporal databases?

2 points

- ☐ Temporal databases provide a uniform and systematic way of dealing with historical data.
- ☐ In temporal databases, data is stored temporarily for a specific task and then deleted after that task is completed.
- ☐ Temporal data have an associated time interval during which the data are valid.
- ☐ All the above

In the context of temporal databases, a is the value of the data at a particular point in time. **2 points**

- ☐ constraint
- ☐ timestamp

- ☐ temporal logic
- ☐ snapshot

Consider the following statements in reference to temporal databases.

2 points

1. Transaction time is the time period during which a fact is true in real world.
2. Valid time is the time period during which a fact is stored in the database.
3. Temporal relation is one where each tuple has associated time; either valid time or transaction time or both associated with it.

- ☐ Statements 1 & 2 are correct
- ☐ Statements 1 & 3 are correct
- ☐ Only statement 3 is correct
- ☐ All the statements are correct

Project-Join Normal Form (PJNF) is also called as

2 points

- ☐ 6NF
- ☐ 4NF
- ☐ 5NF
- ☐ MVD Normal Form
